Even better, Coub will mix the videos with high-quality sound effects. There are more than 100+ video and audio loops in the Coub library. These loops are perfect for music, movies, narration, presentations, and all kinds of promotional materials. You can use Coub to easily create a video presentation. One of the best parts of Coub is that there are tons of high-quality sounds. No matter what kind of presentation you are creating, Coub will have the right sound to fit your purposes. [How to Create a Video Presentation with Coub](#) Here is a quick guide on how to create a presentation using Coub. Click on the Coub library to access hundreds of video and audio loops. Click [Create a New Project](#) to open a new blank project. Click [Add Library](#) to add a library to the project. Click the name of the library you want to add to the project. Select the sound effect you want to add. Click the loops you want to add to the project. Click the [Add Loops](#) button. You can adjust the duration of the video, remove sound effects or choose to edit the loops. Click [Save](#). [How to Use Coub Video Presentations](#) Here is a quick guide on how to use Coub videos to create presentations. As the name suggests, Coub is a video loop creator that is made for presentations. So, the most important part of your Coub presentation is the video. Use video to tell a story, explain your idea or sell a product. Click on a loop to play it. The length of the loop can be set to 1 second, 2 seconds, 5 seconds, 10 seconds, or custom. Click [Play](#) to preview how the loop will look when it plays in your presentation. Click [Play](#) again to preview the loop with the music you set in the loop. You can adjust the volume. Click [Go](#) to your presentation. If you set the length of the loop to be 2 seconds, you can adjust the duration of the presentation by selecting 1 or 2 seconds. The length of the presentation will automatically fit the video. Use the music track in the loop to set the mood for your presentation. If you are making a business presentation, make sure you set the tempo of the music. And if you need a sound effect, make sure you select a sound effect that will fit with the mood you are trying to create. Use custom themes to make your presentation unique. C 82157476af
