About This Game

Let the campaign begin!

Your goal: Win the hearts and minds of America's voters to achieve victory in the 2016 presidential election. Play as one of more than a dozen candidates such as Bernie Sanders, Donald Trump, Hillary Clinton, and more!

Think you can do better than the other candidates? Create your own candidate from scratch and show the rest of those windbags how to make a real run for the White House. Take to the campaign trail and try to out talk, outsmart, and out spend your opponents!

The Political Machine 2016 features updated relevant political topics from across the 2016 presidential campaign. Dozens of national issues including the Keystone XL Pipeline, human trafficking, and the Iran Nuclear Deal have been added, with more updates on the way as the season continues. Regional issues require the candidate to walk a fine line between appealing to the widest range of voters or appearing to "flip flop."

Gaining favor from your voters by interviewing on talk shows might grant you some sympathy, but not everything can be swept under the rug forever. You must always be on the lookout for career-ending scandals like a torrid affair, natural disaster, or an unsavory email trail. They can pop up at any time and change the course of the campaign -- which can put you down in the polls!

Do you think you have what it takes? Take to the campaign trail and show the nation why you should be the next President of the United States of America!

The Only Time where Hillary Can Win.. E.Wolf's +5

1. Fairly in-depth presidential election simulator. Buy advertising, give speeches on issues, go on talk shows, and more to do your best to defeat your opponent.
2. Pretty much every candidate is available to play as, and you can create your own candidates.
3. Excellent graphics. The maps are easy to understand and have vibrant colors, the menus are clear and easy to read, and the candidates are bobbleheads.
4. Plenty of settings to customize each game to your liking. Your opponent's capability, the topics that are primary issues, your starting funds, and more can be edited and even randomized, as well as the length of the game, your starting funds, and more.
5. You can let the AI play by itself. It was very fun putting Donald Trump against various opponents. Do not assume that this simulation is 100% accurate, it is just a game.
